

Features

- Unique Public Profile
 - Connects multiple social media platforms to one unique Rime profile. Rime also helps in collecting and organizing web contents that matters to users, and helps to find people and explore new contents
 - Brings all user's publicly shared content to one timeline
- Guest Public profile
 - Users can create guest profile in Rime of any artist, who is not present in Rime
 - Users can invite other users/moderators in Rime to edit guest profile. This will help users to follow any artist's various social media activities from one place, Rime.
- People and Content search
 - Explore awesome people and get to know what they are sharing, across the platforms
 - Explore contents similar to your interests
- Easy content sharing and people following
 - Content sharing in Rime is easy and effective, no need to share contents in multiple platforms to reach the desired audience. Content shared in platform connected with Rime automatically makes content available to all followers across all the connected platforms connected with Rime
 - No need to follow people across multiple platforms to keep up with their social media activities, just follow the user on Rime and see the complete view of users social media interactions
- Share any URL over the internet and explore more about related content from author and from source
